Dan,

I have read through the Responses to Comments submitted by Paul. Many of his responses refer to revisions in the SAP which I have yet to review for adequate resolution of our comments. Once we have had a chance to review in detail, would a call to discuss any remaining issues be in order prior to EPA approval of the SAP? One such issue which we would like to hear EPA's position on is relevancy of the existing QAPP to this sampling event given the date that the RI work plan was finalized. I have not reviewed the existing QAPP yet to see if there are any time-dependent or other criteria that may conflict with use for the upcoming sampling, but wanted to give you a heads up so we can discuss in a timely manner.

I will be in the office on Monday and will try to give you a call then to discuss next steps.
